ANNOTATSIYA: *Ushbu maqola zamonaviy ta’limda chet tillarini o’qitishning innovatsion usullarini muhokama qiladi. U til o’rganishni yaxshilashda raqamli texnologiyalar, interaktiv o’quv platformalari va o’quvchi markazli yondashuvlarning rolini o’rganadi. Tadqiqot kommunikativ til o’qitish, aralash o’qitish va loyihaga asoslangan faoliyatning o’quvchilarning til kompetensiyasi va motivatsiyasini oshirishdagi samaradorligini ta’kidlaydi. Shuningdek, chet tillarini o’qitish jarayoniga zamonaviy vositalarni — mobil ilovalar, virtual sinflar va gamifikatsiya elementlarini integratsiya qilish bo’yicha amaliy tavsiyalar berilgan.*

АННОТАЦИЯ: *В данной статье рассматриваются инновационные методы преподавания иностранных языков в современном образовании. Исследуется роль цифровых технологий, интерактивных образовательных платформ и ориентированных на учащегося подходов в повышении эффективности освоения языка. В работе подчеркивается результативность коммуникативного метода обучения языкам, смешанного обучения и проектной деятельности в развитии языковой компетенции и мотивации учащихся. Приводятся практические рекомендации по интеграции современных инструментов, таких как мобильные приложения, виртуальные классы и элементы геймификации, в процесс преподавания иностранных языков.*

ANNOTATION: *This article discusses innovative methods of teaching foreign languages in modern education. It examines the role of digital technologies, interactive learning platforms, and student-centered approaches in improving language acquisition. The study highlights the effectiveness of communicative language teaching, blended learning, and project-based activities in enhancing learners' linguistic competence and motivation. Practical recommendations are provided for integrating modern tools such as mobile applications, virtual classrooms, and gamification into the foreign language teaching process.*

KEY WORDS. *Innovative methods, modern education, foreign language teaching, digital technologies, interactive platforms, communicative approach, blended learning, project-based learning, virtual classroom*

It is clear, "Modern Methods and Innovative Technologies of Teaching Foreign Languages" is a testament to the ever-expanding array of tools and techniques that are revolutionizing language education. (3-6). These days nobody can not learning different types of foreign language without technologies. Modern processes are focused on the saving of fundamental education. In this case, in learning of foreign languages can be traced the problem to strengthen practical and activity orientation. As a result, the traditional system of formation of knowledge and skills is undergoing some changes. (2-6). We are seeing, many types of modern processes are engineering keep balance and security in education. The use of these tools will make the process of learning a foreign language more interesting and effective for students. Today, interactive games are becoming a tradition in schools. It is well known that a variety of games help students demonstrate their abilities, focus, increase their knowledge and skills, and become stronger. (4-6). Early teaching English today appears as an innovative process that pedagogy is understood as a managed process of creation, perception, assessment, development and use of pedagogical innovations. The younger school age is characterized by globally operating game motivation at children, and on condition of

the correct organization of educational process and the accounting of this factor development of a foreign language by the child will be rather effective. Early teaching a foreign language gives great practical effect in terms of improving the quality of owning the first foreign language, provides the basis for continuing his studies at the basic school; unique educational and informative value of early foreign language teaching, which manifests itself in an earlier entry of the child to human culture through communication on new language [3]. (1-6). Ability to competently teach a foreign language communication junior high school pupils who are not yet fully proficient communicative skills in their native language — a task very difficult and responsibly. Interest in the subject at an early age is very closely linked with the sense of psychological comfort, needs and readiness to communicate, which makes the teacher at a lesson. The success of the teaching and attitudes of students to the subject depends on how interesting and emotionally teacher conducts lessons. In modern education, teaching foreign languages is inseparable from innovative methods and digital technologies. Traditional grammar–translation approaches may limit students’ activity and communicative skills. Therefore, contemporary methodology emphasizes interactive techniques, learner-centered instruction, and the integration of technological tools. Virtual classrooms: Platforms such as Zoom, Google Classroom, and Microsoft Teams enable distance learning, live communication, and interactive lessons. Mobile applications: Tools like Duolingo, Memrise, and Quizlet help learners expand vocabulary effectively. Multimedia materials: Video lessons, animations, and audio texts strengthen listening comprehension and contextual understanding. This method focuses on using the language as a means of real-life communication. The use of these tools will make the process of learning a foreign language more interesting and effective. Today, interactive games are becoming a tradition in schools. It is well known that a variety of games help students demonstrate their abilities, focus, increase their knowledge and skills, and become stronger. (5-6).

IN CONCLUSION

The benefits of modern innovative educational technologies are the development of students' cognitive activity, educating them in all respects, increasing their interest in subsequent topics.(5-6). The introduction of advanced pedagogical technologies in foreign language lessons, its introduction into the educational process, the discovery of new ways of teaching will lay the foundation for meeting the requirements of state educational standards.
