Annotatsia: Ba'zi insonlar ingliz tilini yuqori xohish bilan o'rganishni boshlasalar-da, bir necha oydan so'ng tilga nisbatan qiziqishlari so'ngani tufayli darslarda faol qatnashishmaydi yoki umuman to'xtatib qo'yishadi. Shu sababli ham, insonlarning aksariyati ingliz tiliga juda murakkab til sifatida qarashadi. O'qituvchilarning bilim va ko'nikmalari qay darajada yuqori bo'lishidan qat'i nazar, dastavval o'quv markazlariga til o'rganish uchun yig'ilgan bir guruh talabalarning ayrimlarigina kuchli ishtiyoq bilan o'rganishda davom etayotganini, qolgan o'quvchilar esa avvalgi qiziqishini yo'qotib qo'yganini yoki allaqachon darslarga kelmay qo'yganini guvohi bo'lamiz. Ushbu maqolada yuqoridagi holatlarning oldini olishda yoki ularni bartaraf etishda o'qituvchilarga qo'l keluvchi bir qancha usullarni ko'rib chiqamiz.

Kalit so'zlar: o'quvchilarni ruhlantirish, metodika, o'zlashtirish, motivatsia, Ingliz tili games, o'rganuvchi, o'qituvchi, talaba.

Аннотация: Хотя некоторые люди начинают изучать английский язык с большим энтузиазмом, через несколько месяцев их интерес часто угасает, что приводит к отсутствию активности на занятиях или полному прекращению

обучения. По этой причине многие считают английский очень сложным языком. Остальные же теряют первоначальный интерес или вовсе перестают приходить на уроки. В школах же, из-за обязательной системы образования, растет число учеников, которые посещают занятия поверхностно, проявляют безразличие к домашним заданиям, и в результате их успеваемость падает. В данной статье мы рассмотрим несколько методов, которые помогут учителям предотвратить или устранить вышеуказанные ситуации.

Ключевые слова: мотивация, учеников, метод, изучение, мотивирование, поощрение, игры, тьютор

Annotation: Although some people start learning English with high motivation, their interest often disappears after a few months. As a result, they stop participating actively or give up on their classes completely. This is why many people think that English is a very difficult language. Even if teachers have great knowledge and skills, we often see that only a few students in language centers continue to study with passion. Consequently, their grades and knowledge levels decrease. This article discusses several methods that can help teachers prevent or solve these problems.

Keywords: motivating students, method, learning, motivating, English, encouraging, games, students, tutor, learners

For decades, the English language has maintained its status as the most widely learned language globally. Although, every year, many individuals start learning it because of diminished sense of motivation. According to statistics from the British Council, approximately 1.5 billion people are learning English currently on a global scale. However, research by MEA Markets shows that 42% of learners discontinue their education due to lack of motivation. Generally, motivation can be categorized in two types: transient motivation, which can push learners to study hard for only a few days or even a few hours, and intransient motivation

which has a strong impact on pushing people to learn something for a long time. To improve learning rates, teachers should know several methods to encourage students. Before starting, students should identify their purpose of learning. If they understand the impact of English on their lives, they will not stop learning when times are tough or when they face difficulties. Therefore, teachers should first ask students about their goals, even if they cannot remember every student's specific purpose. It is natural that different learners have different goals. Young learners might say they want to be a good teacher, speak fluently, or have a high reputation among peers, or they might be forced by their parents. (Often, children are forced to learn by their parents. In this case, teachers should first try to motivate them or make learning more interesting. If the teacher's actions have no effect, they can talk to the parents about the child's other interests). Adults, on the other hand, might want to build a good career, study for a Master's degree, or apply to a university. Once purposes are clarified, teachers should advise students to document their goals in a notebook to ensure they maintain a clear sense of purpose.

Furthermore, the learning environment plays a pivotal role in student engagement. Decorating the classroom with pictures of the culture and cities of English-speaking countries can create an English atmosphere. Moreover, a properly equipped classroom creates a comfort zone for study. However, lessons are not just about a beautiful room; during teaching, it can be beneficial to change the location. Going to parks or places with attractive nature can uplift learners. We must admit that there are many students who face challenges with acquiring grammar structures in English. To avoid this misunderstanding, themes must be taught with a connection to real life. For example, how cases using past perfect tenses would be true, or what would be done when we make some mistakes using articles. In speaking skills, students can have dialogues like shop assistant and customer, taxi driver and passenger, parents and children, etc. Listening to

compliments or receiving gifts from teachers always makes sense of honor or pride to students. Even giving small gifts to students when they do something or get high marks can give big inspiration to students to keep learning. Most teachers give pencils, pens, sweets, or paper stickers. However, buying gifts for many students would be expensive for teachers. When it is costly to tutors, they should not avoid the effort of saying good sentences about students. Nevertheless, sometimes right feedback would have more power than compliments for many students. During the lessons, playing team games or activities is the best way to make a competitive atmosphere. Most students try to study harder when they lose or win in a competition. This method forces students to speak with each other about lessons and themes even after lessons.

In conclusion, to possess deep knowledge in English discipline and motivation plays main role. To encourage students learning psychology and verity types of teaching method is demand from teachers. Changing the learning environment, connecting grammar to real-life situations, and giving timely encouragement can prevent students from losing interest. By creating a competitive atmosphere and remembering each student's goals, teachers can turn language learning from a difficult task into an interesting journey. Ultimately, the right teaching methods and sincere support are the most important factors in overcoming any challenges.
