

## INNOVATIVE METHODS IN PEDAGOGY, TRANSLATION, AND FOREIGN LANGUAGE TEACHING IN MODERN EDUCATION

Scientific Supervisor: **Muratova Dilorom Maxmudovna**  
a teacher of Uzbekistan State World Languages University

Student: **Kurbasheva Raykhona Urazimbet qizi**

Course: 3rd course

University: Uzbekistan State World Languages University

Faculty: Philology Faculty

### Annotation

Ushbu tezis zamonaviy ta'limda pedagogika, tarjima va xorijiy tillarni o'qitishda innovatsion metodlarni tahlil qiladi. Tadqiqot faol ta'lim, muammoli o'qitish va texnologiyalardan foydalanishga asoslangan yondashuvlarni yoritadi. Ushbu metodlar talabalarning lisoniy kompetensiyasi, tanqidiy fikrlashi va muloqot ko'nikmalarini rivojlantirishga xizmat qiladi.

В данном тезисе рассматриваются инновационные методы в педагогике, переводе и преподавании иностранных языков в современном образовании. Анализируются активное и проблемное обучение, а также использование цифровых технологий. Эти подходы способствуют развитию коммуникативных навыков, критического мышления и самостоятельности студентов.

This thesis analyzes innovative methods in pedagogy, translation, and foreign language teaching in modern education. It focuses on active learning, problem-based learning, and technology-assisted instruction. These approaches contribute to the development of students' communicative competence, critical thinking, and learner autonomy.

**Key Words:** innovatsion pedagogika, xorijiy til, tarjima, faol ta'lim, kommunikativ yondashuv, texnologiya, tanqidiy fikrlash, ta'lim metodlari, madaniyat, kompetensiya

инновационная педагогика, иностранный язык, перевод, активное обучение, коммуникативный подход, технологии, критическое мышление, методы обучения, культура, компетенция

innovative pedagogy, foreign language, translation, active learning, communicative approach, technology, critical thinking, teaching methods, culture, competence

In the context of globalization, modern education faces the challenge of preparing students for effective communication and professional activity. Traditional teaching methods are often insufficient to develop linguistic competence, critical thinking, and intercultural awareness. Therefore, innovative approaches in pedagogy, translation, and foreign language teaching have become increasingly important. Active learning, problem-based learning, and technology-assisted instruction help students engage with authentic materials and real-life communication. This thesis aims to analyze innovative teaching methods and their role in improving the quality of language education.

Innovative methods in pedagogy focus on learner-centered approaches that actively involve students in the educational process. Active learning encourages discussion, collaboration, and problem-solving, which increases motivation and responsibility for learning outcomes. In translation studies, task-based activities and the use of computer-assisted translation tools help students develop accuracy and contextual understanding.

In foreign language teaching, communicative language teaching, gamification, and digital platforms create interactive learning environments. These methods improve fluency, confidence, and intercultural competence. Despite challenges such as limited resources and large class sizes, innovative approaches significantly enhance the effectiveness of modern education.

## **Conclusion**

Innovative methods in pedagogy, translation, and foreign language teaching play a crucial role in modern education. They promote student engagement, develop critical thinking, and improve communicative competence. The integration of technology and interactive strategies allows educators to create dynamic and effective learning environments. Although challenges exist, the successful implementation of innovative approaches contributes to the formation of competitive, independent, and culturally aware specialists. Continuous development and adaptation of teaching methods remain essential for meeting the demands of contemporary education.
